

1/3

**FIG.1**

Chromatogram profile (reverse phase HPLC on a C18 column) of the tryptic hydrolysate of bovine α_{s2} casein

2/3

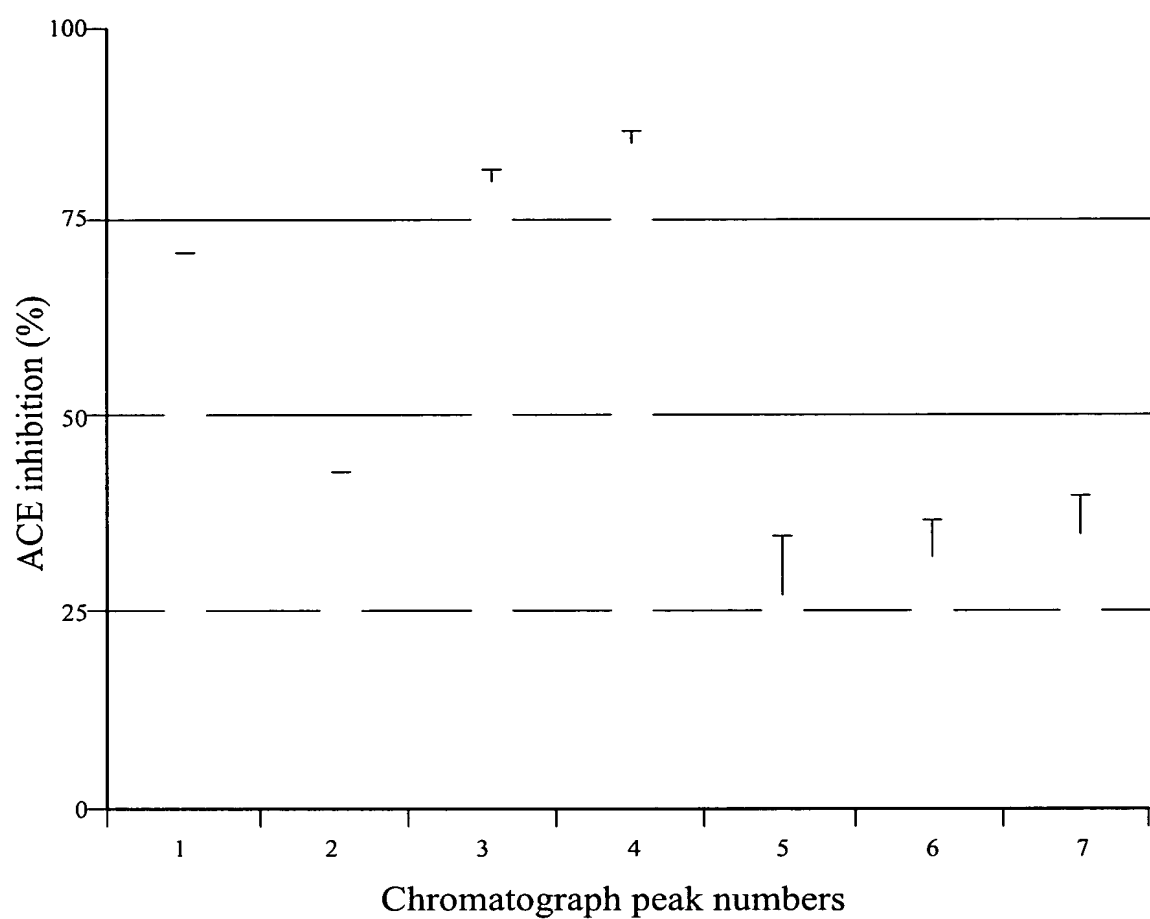

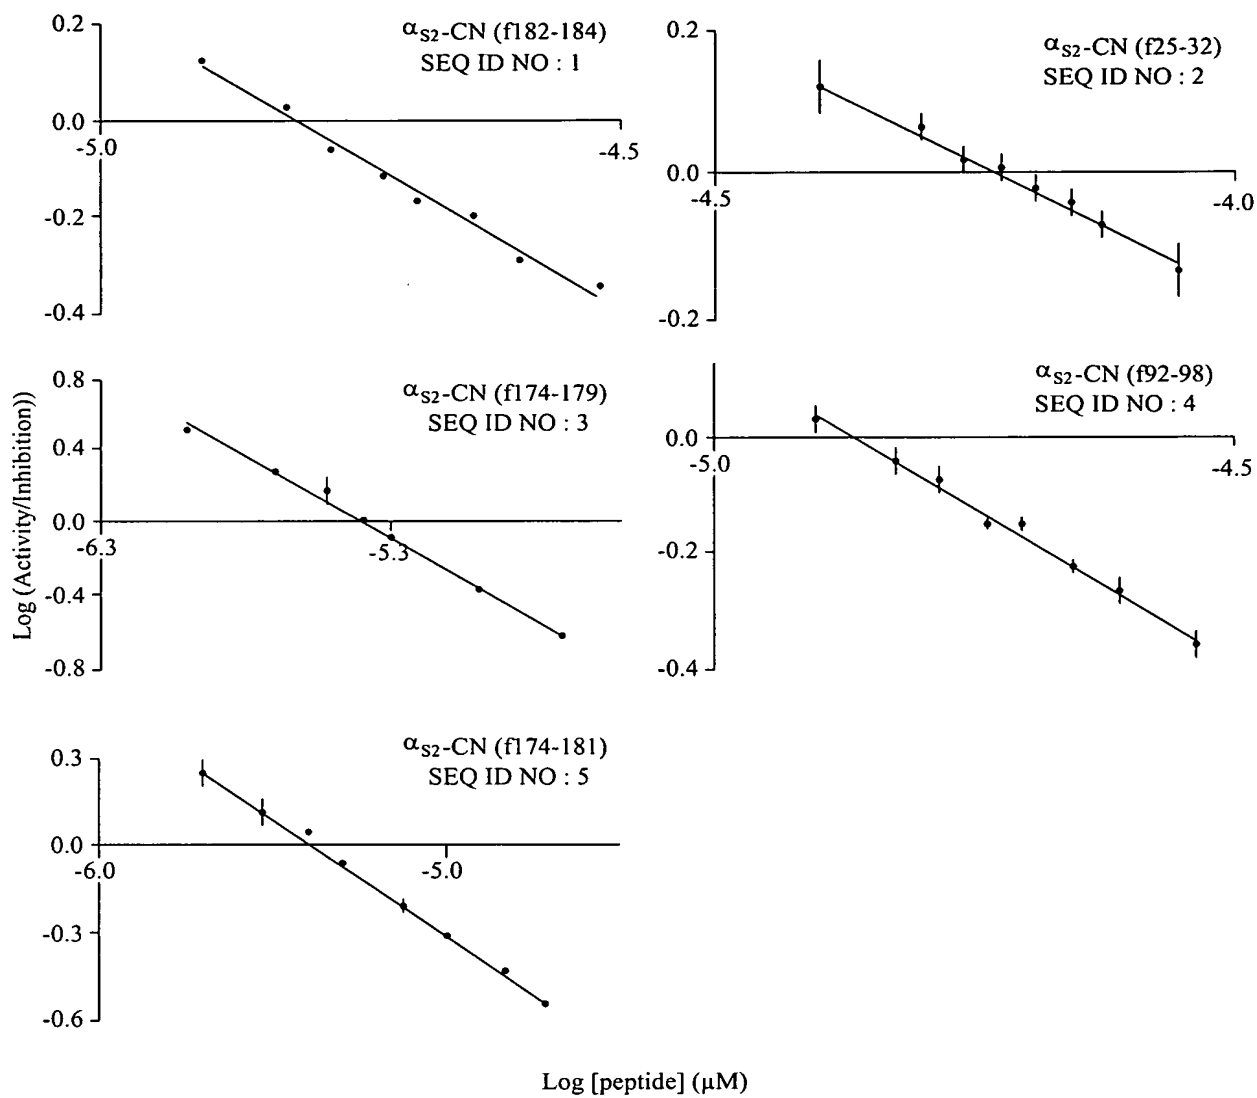

FIG.2

ACE inhibiting activity of trypsinic peptides from bovine α_{s2} casein (the numbers refer to the chromatograph peaks given in FIG.1)

**FIG.3**

Determining the value of IC_{50} for the peptides selected from FIG.2
